Opening 1740403_GuiltyPleaThe_WMA_32.zip

You have chosen to open

 1740403_GuiltyPleaThe_WMA_32.zip
which is a: Compressed (zipped) Folder (157 MB)
from: <https://s3.amazonaws.com>

What should Firefox do with this file?

Open with Windows Explorer (default)

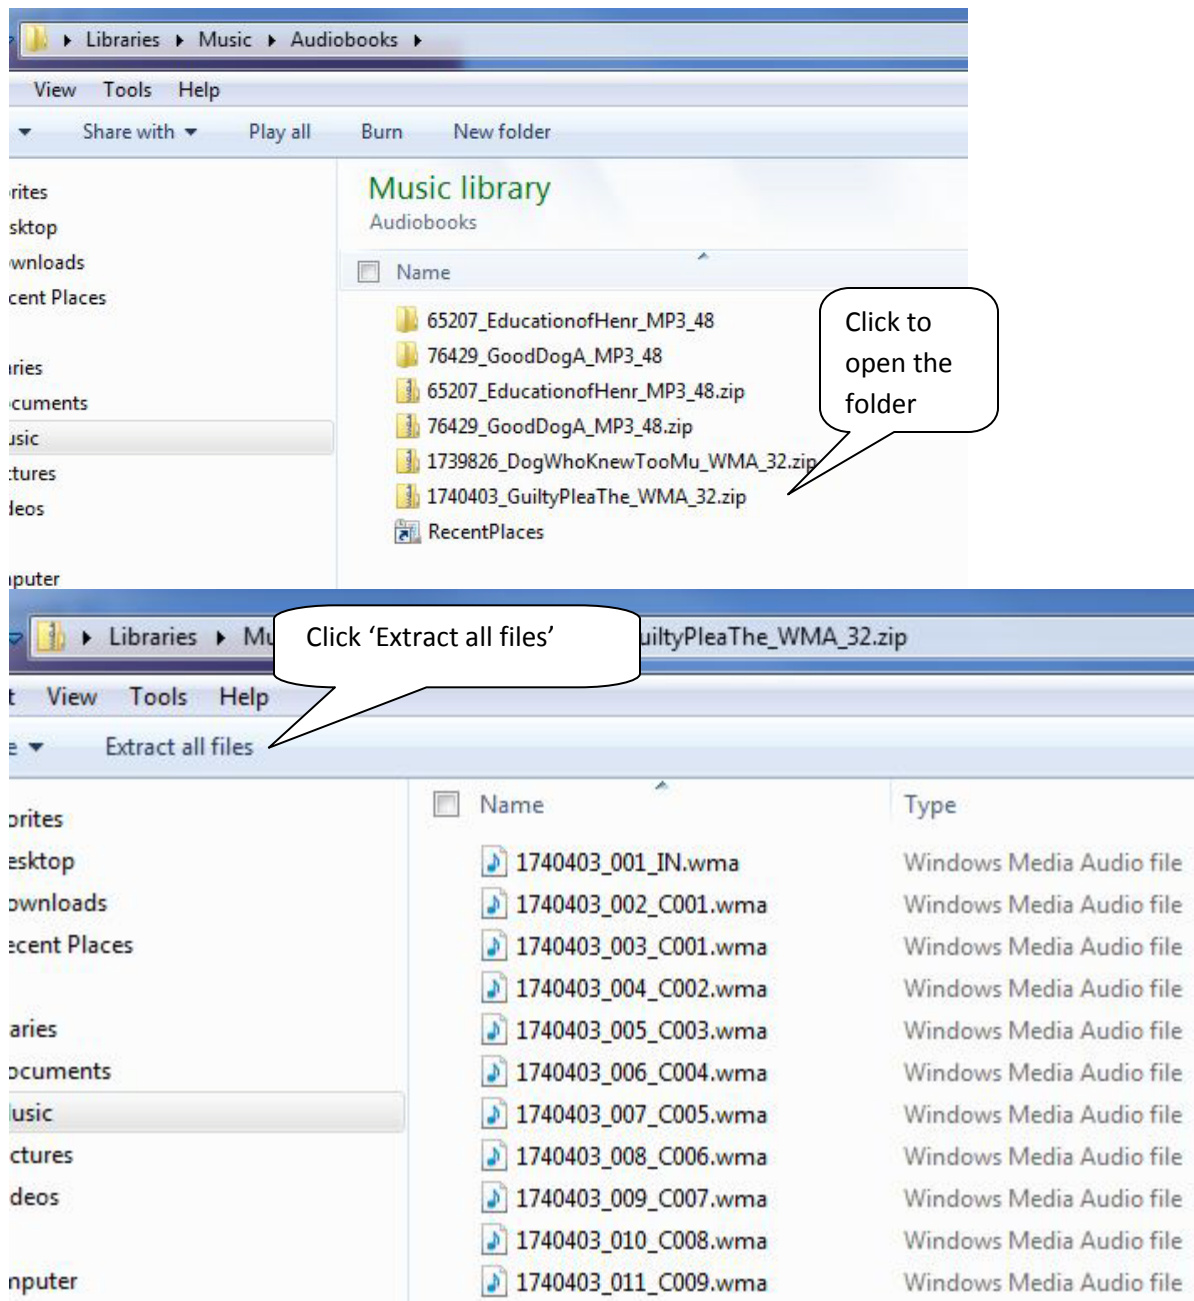

Save File

Do this automatically for files like this from now on.

OK Cancel

Series Series
Series # Book 2 of 2

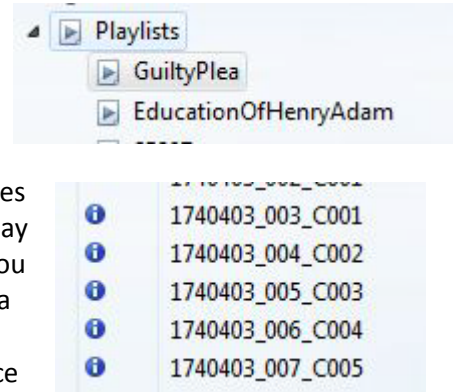

1. A windows dialog box will appear prompting you to open or save a .zip (compressed) file.
2. Select Save and browse to a directory on your PC to save
3. The best place to save is in a directory that Windows Media Player indexes for content, like the Music folder in your user account.
4. Use Windows Explorer file manager to navigate to the folder. The folder will be named with a number and part of the title of the downloaded book with a .zip file name.

Syncing to a Device

5. Open Windows Media Player

- Provided that you put the files in a directory recognized by Windows Media Player, you should now see the title in your playlist
- **If you have downloaded an encrypted WMA file,** you may see an exclamation point by the file names in Windows Media Player. Click one of them to play and a dialog box will open from OneClick asking you to log in with your OneClick credentials to obtain a license.
- You should be able to synch the files to your device from this point by clicking the Synch button in Windows Media Player and dragging the new playlist to the Synch list and clicking Start Synch.
